

TextFin 2.0 – Easy entry of continuous text in Microsoft Dynamics NAV

Easy entry of continuous text in Microsoft Dynamics NAV

For a long time it has only been possible to record multiline text in Microsoft Dynamics NAV line by line.

Text entry with the Text Editor

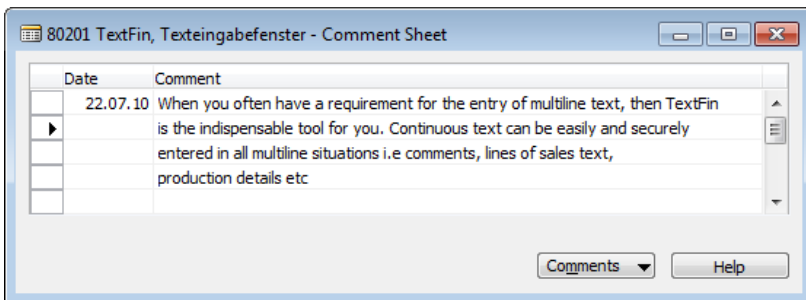

Would you like to enter multiline text, call up the function "edit...", this will open a text entry window. Enter your text here, or copy it from another source without having to worry about the length of the line, TextFin will automatically adjust the width of the entry to the situation and to the chosen Microsoft Dynamics NAV data.

Adding to text and automatic line break

It's annoying when you want to insert text into a multiline block in Microsoft Dynamics NAV. As the line length is limited, this can lead to an annoying shifting of the lines. TextFin adjusts the width of the entry window to the maximum line length and takes care of the necessary line break itself.

The module has been kept very simple. Functions such as automatic word separation and formatting have been consciously avoided.

TextFin - Enter multiline text easily and save time

When you often have a requirement for the entry of multiline text, then TextFin is the indispensable tool for you. Continuous text can be easily and securely entered in all multiline situations i.e comments, lines of sales text, production details etc.

Comfortable. Clearly laid out. Time Saving.

TextFin - Your benefits

With TextFin it is possible to easily enter multiline text. Don't worry about the length of the line instead just start writing. The line breaks will be automatically realized word by word.

TextFin - Your advantages

- Time saving
- Comfortable entry and editing of multiline text
- Automatic line break
- Automatic adjustment to the field length in Microsoft Dynamics NAV dependent on the choice of data
- Text display shown and saved in the editor as it is in Microsoft Dynamics NAV
- TextFin can be easily built into other additional developments (1 line code)

TextFin - Requirements

- Easy implementation by your NAV Partner—also in your own or branch developments
- For TextFin a small program must be installed at each individual workplace
- Microsoft Dynamics NAV technical 3.70 or higher—also with RTC Client
